

Mania Totomi

Product Designer

ABOUT ME

Product designer with 8+ years of experience shaping complex B2B systems, with a focus on turning ambiguous product spaces into clear, usable workflows.

I joined Pollfish at an early stage and helped evolve it into a mature research platform through to its acquisition in 2022. I now lead design across the end-to-end survey lifecycle, working closely with Product, Engineering, and Data to define and ship AI-driven capabilities, while actively using code and AI tools to prototype and validate ideas.

My approach combines structured thinking with hands-on execution, using prototyping (primarily with coding and AI tools) to explore, test, and refine solutions in complex systems.

EXPERIENCE

2024 - today / Pollfish	Lead Product Designer - Leading design across the end-to-end survey creation and results experience - Shaping AI-driven product direction, from early concepts to shipped features - Designed and launched AI-powered survey creation workflows and conversational interfaces - Introduced AI-assisted prototyping practices within the team (Figma + Cursor and code-based prototyping), improving speed and validation of ideas - Hands-on in prototyping interactions using code and AI tools to explore complex flows and edge cases - Providing design direction and raising quality across a small design team
2022 - 2024 / Pollfish	Senior Product Designer - Evolved the end-to-end survey creation flow across Questionnaire, Audience, and Results - Led major iterations of core product areas, improving usability in a complex research workflow - Contributed to early exploration and integration of AI capabilities within the product - Worked cross-functionally to align product, data capabilities, and technical constraints
2018 - 2022 / Pollfish	Product Designer - Designed the dashboard of the Publisher department of Pollfish - Established and scaled the design system - Collaborated with Product and Engineering in a fast-paced environment - Led key product initiatives across survey workflows
2016 - 2018 / BRAVE(ex Webjar)	Digital Designer Designed websites, branding, and digital products across industries
Additional Experience /	Product Designer Working across early-stage products and client projects, focusing on structuring workflows, personalization, and operational tools - Project Alpha (confidential codename): Construction collaboration platform - CtrlEat: Food discovery app based on nutrition preferences - Cassiopeia: Hospitality management tool - Digital Maturity Self Assessment Tool (DMSAT) / Eurobank: Web design and product design

TOOLS

Figma · Cursor · AI tools · React/Tailwind (basic)

EDUCATION

Graphic Design in University of West Attica
